

Creating Subscription IDs on Monthly and Yearly Basis in App Store Connect for the Trackpark App

This document outlines the steps to create monthly and yearly subscription IDs for the "Trackpark" app within App Store Connect. These subscriptions will allow users to access premium features of the app.

Prerequisites

Before creating subscription IDs, ensure you have:

- An active Apple Developer Program membership.
- Access to App Store Connect with the necessary roles (e.g., App Manager or Admin).
- Your Trackpark app created and set up in App Store Connect.

Understanding In-App Purchases and Subscriptions

In-App Purchases (IAPs) are additional content or functionality that you sell within your app. Subscriptions are a type of IAP that allows users to access content or services for a recurring period.

There are two main types of subscriptions:

- **Auto-Renewable Subscriptions:** These subscriptions automatically renew until the user cancels them.
- **Non-Renewing Subscriptions:** These subscriptions do not automatically renew and expire after a set period. For the Trackpark app, we will focus on auto-renewable subscriptions for ongoing access to features.

Step-by-Step Guide to Creating Subscriptions

Follow these steps to create your monthly and yearly subscription IDs for the Trackpark app:

Step 1: Navigate to My Apps

1. Log in to [App Store Connect](#).
2. Click on "My Apps."
3. Select your "Trackpark" app from the list.

Step 2: Access In the left sidebar, Monetization

1. Then, click on "Subscriptions."

Step 3: Configure Subscription Group

All subscriptions must belong to a subscription group. This allows users to switch between different subscription options within the same app (e.g., monthly vs. yearly).

1. **Create a New Subscription Group:**
 - If you don't have an existing subscription group, click "Create New."
 - Enter a name for the group (e.g., "Trackpark Premium Subscriptions or Pro").
 - Click "Create."
2. **Add to an Existing Subscription Group:**
 - If you have an existing group, select it from the dropdown.

Step 4: Add Subscription Localizations

Select the subscription group and then it opens a new page. In `Subscriptions` section press `Create` button.

1. **Reference Name:** Internal name (e.g., "Trackpark Monthly Premium"). This is not visible to users.
2. **Product ID:** A unique alphanumeric identifier for your subscription (e.g., `com.yourcompany.trackpark.monthlypremium`). This is crucial for your app's code to identify the subscription.
3. **Subscription Durations:** This is where you define the monthly and yearly options.
 - **Monthly Subscription:**
 - Click "Add Localization."
 - Select the desired language (e.g., English (U.S.)).
 - **Display Name:** "Trackpark Monthly Premium" or "Trackpark Premium (Monthly)".
 - **Description:** "Unlock all premium features for one month."
 - **Subscription Period:** Select "1 Month."
 - **Price:** Set your desired price for the monthly subscription.
 - **Yearly Subscription:**
 - Click "Add Localization" again.
 - Select the desired language (e.g., English (U.S.)).
 - **Display Name:** "Trackpark Yearly Premium" or "Trackpark Premium (Yearly)".
 - **Description:** "Unlock all premium features for one year and save!"
 - **Subscription Period:** Select "1 Year."
 - **Price:** Set your desired price for the yearly subscription, often at a discount compared to 12 monthly payments.

Step 6: Set Up Subscription Prices

1. For each duration (Monthly and Yearly), click on "Add Price."
2. Select the **Territories** where this subscription will be available. You can choose "All Territories" or specify individual regions.
3. Choose the **Pricing Tier**. Apple provides pre-defined pricing tiers for different currencies.
4. Optionally, you can set up **Subscription Offers** (e.g., introductory offers, promotional offers) if desired. This is more advanced and can be done after the initial setup.

Step 7: Clear for Review

After configuring all details, ensure your subscription is "Clear for Review." This means it's ready to be submitted with your app update.

Important Considerations

- **Product IDs:** Use a consistent naming convention for your Product IDs (e.g., `com.yourcompany.appname.subscriptiontype.duration`). This helps in managing them in your app's code.
- **Pricing:** Research competitor pricing and consider your target audience when setting subscription prices.
- **Trial Periods:** Consider offering free trial periods to encourage users to subscribe. This is configured within the subscription settings.
- **Restore Purchases:** Implement logic in your app to allow users to restore their purchases across devices.
- **Subscription Management:** Provide clear instructions within your app on how users can manage or cancel their subscriptions (e.g., linking to their App Store subscription settings).

By following these steps, you will successfully create your monthly and yearly subscription IDs for the Trackpark app in App Store Connect, allowing you to monetize your premium features.
